

what is called this typa of image or section in web development?

This kind of section is usually called an **Image Gallery** (or **Photo Gallery**).
Because the images are arranged in different sizes like tiles, it's also commonly called a:

- **Image grid**
- **Mosaic gallery / Mosaic layout**
- (Sometimes) **Collage-style gallery**
- If the heights are uneven and "Pinterest-like", that one is called **Masonry layout** (your screenshot looks more like a **mosaic grid**, not masonry).

In web development, it's typically built using **CSS Grid** (best for this exact "some items are bigger" layout).

Example (CSS Grid Mosaic Gallery)

html

Copy code

```
<section class="gallery">
  
  
  
  
  
  
</section>
```

css

Copy code

```
.gallery{
  display: grid;
  grid-template-columns: repeat(6, 1fr);
  grid-auto-rows: 140px;
  gap: 12px;
}
```

```
.gallery img{
  width: 100%;
  height: 100%;
  object-fit: cover; /* crops nicely */
  border-radius: 8px;
}

/* Make the top image like a banner */
.big{
  grid-column: 1 / -1; /* full width */
  grid-row: span 2; /* taller */
}

/* Different tile sizes (example) */
.a{ grid-column: span 2; grid-row: span 2; }
.b{ grid-column: span 2; grid-row: span 2; }
.c{ grid-column: span 2; grid-row: span 1; }
.d{ grid-column: span 2; grid-row: span 1; }
.e{ grid-column: span 4; grid-row: span 2; }
```

If you want, tell me: do you want it **exactly like the screenshot** (same tile positions)? I can map the exact grid spans for each image.
